

How Powerful Can Your Invested Dollars Be?

Einstein called compound interest the "8th Wonder of the World". To see how impactful compounding can be for you, we've "crunched the numbers" and displayed them in the chart below. This illustrates the multiplication potential of your invested dollars by certain ages. Additionally, a side-by-side comparison of the monthly investment required to reach \$1 Million and \$2 Million respectively are listed by age.

Age	Multiplication Potential	Monthly Investment to Attain \$1 Million by age 65	Monthly Investment to Attain \$2 Million by age 65	Age	Multiplication Potential	Monthly Investment to Attain \$1 Million by age 65	Monthly Investment to Attain \$2 Million by age 65
